

AI Savings Maturity Assessment

From logs-only visibility to lifecycle cost control.

Maturity levels

ML Mind can start as visibility and progress toward direct control as trust and integration mature.

Area	What to review
Level 1 Observe	Logs, telemetry, dashboards and waste discovery.
Level 2 Optimize	Pre-model context and RAG control.
Level 3 Control	Gateway routing, fallback, cache and verification.
Level 4 ModelOps	Serving, GPU, batching and model fleet optimization.
Level 5 Lifecycle	Training cost governance and release gates.
