

Executive ROI Brief

A concise stakeholder brief for CFO, CTO and board-level review.

Business case

AI cost control must connect engineering telemetry to financial outcomes while avoiding blind cost cutting.

Area	What to review
RAG/context	Identify irrelevant chunks, stale sources and oversized context.
Retries	Find repeated failures, tool loops and blind reruns.
Routing	Map requests to the cheapest safe model by risk and complexity.
Cache	Find verified repeated answers that can be served without new inference.

Decision framing

Start with audit, validate with pilot, then expand control level based on proven savings and risk tolerance.

Area	What to review
CFO view	Spend visibility, budget recovery and unit economics.
CTO view	Reliability, governance and platform control.
AI team view	Lower cost without breaking production quality.
