

Enterprise Procurement Checklist

A checklist for evaluating ML Mind in security, privacy, value and deployment review.

Review areas

Use this checklist to align finance, platform, security and procurement before a pilot.

Area	What to review
Security	Data minimization, access control, retention and private deployment.
Value	Waste categories, baseline data, estimated savings and pilot success criteria.
Implementation	Required telemetry, integration level, owner and rollout plan.
Legal/privacy	Privacy policy, processor review and data handling brief.
